

## Dimensional tolerances

The indicated tolerances may not be kept by second quality boards.

N.B.: The indicated values of tolerances comply with EN 634-1.

## Coating

Painted boards shall be evenly covered with paint. Colour stability is guaranteed for 3 years (corresponding to the warranty by the paint supplier).

Colour tones can be chosen from RAL or NCS colour tables. Practicability of the chosen colour tone should be consulted with us.

The samples of a chosen colour tone are coated (sprayed) manually. Appearance of the samples can differ from the delivered machine-coated (rolled) boards (e.g. by structure and covering power of the coating). The samples serve as approximate information about the color tone only.
